**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30, drawn to an image sensor, classified in class 250, subclass 208.100.
  - II. Claims 31-63, drawn to a method of fabricating an image sensor, classified in class 438, subclass 73.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case apparatus of Invention I does not necessarily require the step of applying a sacrificial material to second micro-lens array.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. If applicant chooses Invention I, the applicant is further required to elect one of the following species:
  - Species I-1, Fig 3b (claims 1-16, and 29).
  - Species I-2, Fig. 4 (claims 17-22, and 30).

5. If applicant chooses Invention II, the applicant is further required to elect one of the following species:

Species II-1, Fig. 5 (claims 31-47).

Species II-2, Fig. 4 (claims 48-61).

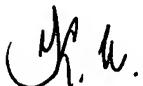

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
